

NEEL PATEL

+91 83207 84449 | neelpatel0179@gmail.com | Ahmedabad, Gujarat

PROFILE SUMMARY

“A passionate Information Technology student with a strong interest in Data Science, Machine Learning, and real-world problem solving. Skilled in Python, data analysis, and building practical projects like smart surveillance systems and predictive models. Completed a Data Science internship, gaining hands-on experience in working with real datasets and extracting insights. Eager to apply my skills in a professional environment and continuously learn and grow in the field of technology.”

EDUCATION

Diploma in **Information Technology**, Govt. Polytechnic Ahmedabad. [June 2025]

B.Tech in Information Technology, **LJ Institute of Engineering & Technology** (Pursuing)

Certificate	Month & Year	Board/ University	Percentage/ CGPA
S.S.C	March 2022	G.S.E.B	78.00 %
Diploma (Sem5)	December 2024	G.T.U	8.70
Diploma (Sem6)	June 2025	G.T.U	7.89

SKILLS

Technical Skills	Python, Machine learning, Django, Data cleaning, data annotation, MySQL, basic AWS
Soft Skills	Communication skills, Team Collaboration
Tools & IDEs	Visual studio Code, pyCharm, Eclipse Google Colab, jupyter Notebook

INTERNSHIP

- A 6 weeks internship on **DataScience And ML** at Brainy Beam.
- A 15 days internship on **Web Development** at Patel Web Solution.

CERTIFICATION

- Certified for completing a 15-day Micro-Internship on **Web Development** (19 Feb – 5 Mar 2023).
- Certified for completing 6-week **DataScience and ML** internship with Brainy Beam (June–August 2024).
- **Cloud Knight (AWS Workshop)** - ACM X Encode + mini Hackathon (Winner)

PROJECTS

1. GuardEye – Smart Surveillance and Alert System

Developed a smart surveillance system for **motion detection and real-time alert notification**.

Implemented image-based classification to detect suspicious activity and send alerts with captured images.

Integrated frontend interface with backend processing for live video monitoring.

Technologies: Python, OpenCV, HTML, CSS, JavaScript

2. House Price Prediction System – ML-based Price Estimation Tool

Built a machine learning model to **predict house prices** based on features like location, area, and amenities.

Performed data preprocessing, feature selection, and model training for accurate predictions.

Developed a simple interface to input property details and display predicted prices.

Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib

3. Netflix Movie Recommendation System – Personalized Recommendation Engine

Developed a **recommendation system to suggest movies** based on user preferences and viewing history.

Implemented content-based filtering techniques for accurate recommendations.

Processed and analyzed movie dataset to generate similarity scores.

Technologies: Python, Pandas, Scikit-learn

4. Google Play Store App Rating Prediction – ML-based Rating Analysis

Built a predictive model to **estimate app ratings** based on features like category, reviews, and installs.

Performed data cleaning, handling missing values, and feature engineering.

Visualized data trends and evaluated model performance for better accuracy.

Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib
